

CSCI-E97**Grade Sheet for Assignment 1**

Name _____

Graded By _____

Execution

<i>Criteria</i>	<i>Grader Comments</i>
Code and documentation are packaged per specification	
Code compiles with the command javac cscie97/asn1/knowledge/engine/*.java cscie97/asn1/test/*.java	
Code runs “out-of-the-box” with the correct java command and the two input files supplied with assignment. {The student might have an alternate command line for this}	
Additional features work as documented (e.g., student supplies additional input files that demonstrate error handling or other working features of program)	
Other Comments	
Grade	

Design Feedback and Source Code Review

<i>Criteria</i>	<i>Grader Comments</i>
Written documentation provided describing any variations from design with justifications, and feedback on the Knowledge Graph Design.	
General organization of code, use of packages as prescribed. Code is well commented	
Appropriate use of exception handling (both on raising exceptions and catching exceptions)	
General quality of implementation (clarity, readability, commenting)	
Other comments (e.g., what improvements could the student make)
